

## **Testimonials for *Everyone's Universe***

When you've got all five senses and both your legs work, it's easy to miss how often society neglects those for whom this isn't true. In *Everyone's Universe*, Noreen Grice, a uniquely inspired champion of astronomy education, has identified activities and places in America where, no matter your level of sensory or physical limitation, the universe is accessible to all. As it should be."

— **Neil deGrasse Tyson**

**Astrophysicist & Director, Hayden Planetarium  
American Museum of Natural History**

"I am convinced that by incorporating Noreen's unique brand of accessibility into our star parties, talks, and other astronomy programs, we will make our activities more relevant for society at large ...we may create little miracles of perception and open windows to infinity...and we will reap great rewards of satisfaction and enjoyment!"

—**Steve Dodson, Stargazer Steve**

"In a practical and powerful way *Everyone's Universe* establishes the twenty-first century paradigm for engaging everyone in the wonder of astronomical exploration. The experience, innovation, and passion that Noreen Grice brings together in this new resource is certain to help create a new movement of backyard astronomers."

— **Mark Riccobono, Executive Director**

**Jernigan Institute, National Federation of the Blind**

"*Everyone's Universe* will be invaluable to those facing an accessibility issue, allowing everyone to enjoy the beauty of the sky."

—**David Eicher, Astronomy Magazine**

"This is one helpful volume on a subject for which I received no training when I was new to the planetarium profession."

—**April Whitt, International Planetarium Society**

"Most of the universe may be out of reach, but it's not inaccessible. Noreen Grice is determined to make it more accessible. She has pioneered accessible astronomy for nearly three decades and has developed innovations that download the sky into the hands of those whose grasp it eluded. Her new book is a marvel of encouragement and practical advice. It will certainly expand the universe of accessible astronomy. *Everyone's Universe* shows how it's already being done and how easy it is to get everyone in touch with the sky."

—**Dr. E.C. Krupp, Director**

**Griffith Observatory, Los Angeles**

"*Everyone's Universe* is a must-read for anyone involved in astronomy outreach and should be in possession of every astronomy club and facility that deals with the general public."

—**Glenn Chaple, Astronomy Magazine**

"Noreen Grice has done a great job creating a must-have guide on how to make the universe more accessible."

—**Damien Wimbush**

**Assistive Technology Training Programs Manager  
California State University Northridge Center on Disabilities**
